Get automatic daily backups & unlimited cloud storage

Automate your daily backups and initiate an extra backup as many times as you need. Get calendar access to all of your backups through the Rewind Vault for easy restores. All of the backups are stored on Rewind's secure and redundant cloud with unlimited cloud stage and 365 days retention, without any additional cost to you.

Restore your account in a few clicks

Rewind makes data recovery fast and easy. You can restore your whole Confluence instance or any item of your choice in a few clicks and recover from any disaster or mistake.

To recover your Confluence instance, all you need to do is log in to your Rewind account, choose a date when everything worked, and click restore. This ensures you get back to business fast in case of a site-wide problem or a disaster. You can restore any item by choosing the item backup on Rewind Vault, choosing a date and clicking restore.

No submitting tickets, coding, or lost productivity.

Any questions?

If you have a question on the backup coverage, product features, or need support with the process please contact us at sales@rewind.com.

Items we backup and restore

Backups are only useful if they can be restored quickly when needed. Rewind Backups for Confluence provides automatic, on-demand restores for your Confluence account. With Rewind, you can restore your whole Confluence instance (advanced restores) or an item of your choice (item-level restores) in just a few clicks through Rewind's on-demand portal. (Item-level restores include the child items of the item that is restored if applicable - eg. Space restore will include related pages . Advanced restores include all items and child items as listed below)
